

PATIWAT KHUONGBUN

ปทีวดี ขวัญบุญ

Senior Database Administrator · Middleware · AWS Cloud Operations

Nonthaburi / Bangkok, Thailand · patiwat.khuongbun@icloud.com · (+66) 098 445 4263

linkedin.com/in/patiwat-khuongbun

PROFESSIONAL SUMMARY

Senior Database & Infrastructure Specialist with 15+ years across Oracle, Microsoft SQL Server, and PostgreSQL on both on-premise and AWS environments. Triple AWS-certified (Solutions Architect – Associate, SysOps Administrator – Associate, Cloud Practitioner) and recipient of two 2024 Allianz Pinnacle Awards. Hands-on experience leading enterprise database and middleware migrations to AWS RDS and EC2, with an additional foundation in applied machine learning research (Master of Economics, published SET index prediction paper) and a recent self-built Retrieval-Augmented Generation pipeline on PostgreSQL/pgvector — well suited to data-intensive and AI-infrastructure roles that bridge database operations and analytics.

Currently seeking new opportunities in Senior DBA / Cloud Infrastructure roles.

CORE COMPETENCIES

- Database Administration & Performance Tuning (AWS)
- Cloud Infrastructure Operations
- Middleware Platform Operations
- Hybrid Infrastructure & Cloud Migration
- Production System Reliability & Incident Response
- Disaster Recovery & Backup Strategy
- Infrastructure Monitoring & Alerting
- Operational Automation & Tooling
- Root Cause Analysis & Post-Incident Improvement
- Cross-Team Collaboration with Development Teams

SELECTED PROJECT HIGHLIGHTS

Enterprise Cloud Migration: On-Premise → AWS

Allianz Technology / Accenture · 2021–2026

- Migrated 30+ Oracle, MS SQL Server, and PostgreSQL workloads from on-premise infrastructure to AWS RDS, supporting business-critical insurance applications with zero data loss during cutover.
- Deployed and operated 30+ enterprise middleware platforms (Oracle WebLogic and non-WebLogic) on AWS EC2, including SSL certificate installation and load balancing integration via AWS ELB.
- Maintained high availability across business-critical applications through proactive monitoring, backup verification, and incident response, supporting day-to-day operations for a large enterprise user base.

AI Data Infrastructure: Bilingual RAG on PostgreSQL / pgvector

Independent Project · 2026 · github.com/PKXIII/just-pgvector-RAG-pipeline-test-project

- Built an end-to-end Retrieval-Augmented Generation pipeline on PostgreSQL + pgvector, indexing 34 machine-learning and quantitative-finance papers (15,000+ chunks) with HNSW cosine search.
- Engineered the full data path a DBA owns — PDF ingestion and Thai/English OCR, local multilingual embeddings (bge-m3), retrieval tuning, and grounded, cited answers via the Anthropic Claude API.
- Exposed the corpus as an MCP (Model Context Protocol) server so any LLM client can query it as a tool — turning a vector database into reusable AI data infrastructure.

Database Migration Tooling: Microsoft Access → Oracle 11g

Samart Comtech · 2013–2019

- Designed and implemented PL/SQL and Python tooling that migrated legacy Microsoft Access datasets into Oracle 11g, reducing manual conversion effort and improving downstream data consistency across project teams.
- Modernized the Civil Registration System by replacing direct database connections with Java EE web services.

Applied Machine Learning Research

Master of Economics, Kasetsart University · 2020

- Published peer-reviewed research on predicting SET index movement direction using technical indicators and machine learning at the 58th Kasetsart University Annual Conference.

TECHNOLOGY EXPERTISE

Cloud:	Amazon Web Services (RDS, EC2, ELB, IAM, CloudWatch, S3, VPC)
Databases:	Oracle, Microsoft SQL Server, PostgreSQL
AI / Data:	pgvector, RAG pipelines, MCP servers, sentence-transformers (bge-m3), Anthropic Claude API, Hugging Face
Middleware:	Oracle WebLogic, Oracle Forms & Reports, IBM WebSphere, IIS, Apache HTTP Server
HA / DR:	Oracle Data Guard, Oracle GoldenGate, RMAN, IBM Security Guardium
Monitoring:	AWS CloudWatch, Zabbix, Oracle Enterprise Manager
Automation:	Shell scripting, Python automation, Terraform
ITSM / Tools:	Change Advisory Board (CAB), ServiceNow, Jira, Git
Languages:	PL/SQL, Python, Java, C# .NET, PHP, JavaScript
OS:	Linux, Windows Server

PROFESSIONAL EXPERIENCE

Accenture (Thailand) Co., Ltd.

Jul 2025 – Feb 2026

Senior Database Administrator · Middleware & Hybrid Systems

Transferred from Allianz Technology (Thailand) as part of corporate restructuring; continued previous responsibilities.

- Continued operations of AWS RDS and EC2 middleware workloads under the Accenture managed services delivery model.
- Maintained 30+ databases and 30+ middleware instances with no production-impacting incidents during the corporate transition period.

Allianz Technology (Thailand) Co., Ltd.

Feb 2021 – Jun 2025

Senior Database Administrator · Middleware & Hybrid Systems

Transferred from Allianz Ayudhya Assurance as part of corporate restructuring, with expanded focus on cloud infrastructure and AWS environments.

CLOUD OPERATIONS & MIGRATION

- Led day-to-day operations and migration support for 30+ Oracle, MS SQL Server, and PostgreSQL workloads across AWS RDS and on-premise environments — including provisioning, patching, backup, disaster recovery, and tuning.
- Deployed and operated 30+ enterprise middleware platforms (Oracle WebLogic and non-WebLogic) on AWS EC2, including SSL certificate installation and load balancing integration via AWS ELB.
- Configured monitoring, alerting, and backup verification across middleware and database environments using AWS CloudWatch and Zabbix, enabling faster incident detection and proactive resolution.
- Partnered with cloud governance and security teams on access control, IAM policies, and infrastructure readiness for new application onboardings.
- Applied AWS operational best practices aligned with Cloud Practitioner, Solutions Architect – Associate, and SysOps Administrator – Associate certifications.

RECOGNITION

- **Allianz Pinnacle Award – The Best Performer (2024)** for sustained operational excellence in database and middleware delivery.
- **Allianz Pinnacle Award – Awesome Team (2024)** for cross-functional collaboration on cloud migration.
- **OPUS Hackathon (2023)** — IF06-SDR & Allianz Cloud Run.

Allianz Ayudhya Assurance Plc.

Dec 2019 – Jan 2021

Database Administrator · Middleware

DATABASE ADMINISTRATION

- Provisioned, patched, upgraded, and deployed Oracle and Microsoft SQL Server databases supporting 20+ business-critical insurance applications.
- Performed performance tuning, capacity planning, index optimization, and schema changes; reduced critical query response time by approximately 50%.
- Ensured database availability, integrity, and compliance with corporate IT and audit policies.

MIDDLEWARE ADMINISTRATION

- Provisioned, patched, and configured Oracle WebLogic, IBM WebSphere, and IIS platforms; supported deployment of new applications and services on these middleware stacks.
- Resolved production issues impacting system uptime, contributing to 99% application availability.

SYSTEM OPERATIONS & CONTINUOUS IMPROVEMENT

- Handled daily operational tasks including incident tickets, change requests, and service requests; participated in Change Advisory Board (CAB) meetings.
- Authored runbooks and SOPs to enhance knowledge sharing and reduce operational risk; applied security controls and maintained audit compliance.

Samart Comtech Co., Ltd.

Feb 2013 – Dec 2019

Database Administrator · Programmer

- Administered and optimized Oracle 11g databases — routine monitoring, PL/SQL tuning, index optimization, and schema deployment.
- Designed and implemented database migration tooling (PL/SQL and Python) for converting Microsoft Access datasets to Oracle 11g across multiple government project deliveries.
- Participated in Oracle 12c implementation on Oracle Exadata; collaborated with vendors on IBM Security Guardium and Oracle GoldenGate deployments.
- Built supporting backend systems (PL/SQL, Java, C# .NET, PHP) for document scanning, civil registration, and land information services.
- Managed subcontractor performance — tracking, reporting, and presenting progress to internal and client stakeholders.

Maple Plus Co., Ltd.

Dec 2010 – Sep 2012

Programmer

- Maintained and enhanced a Geographic Information System (GIS) on PHP and Oracle 10g; built Java tooling for migrating data from Microsoft Access into Oracle 11g.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AWS Certified SysOps Administrator – Associate** (2024)
- **AWS Certified Solutions Architect – Associate** (2023)
- **AWS Certified Cloud Practitioner** (2023)
- Microsoft Azure training: AZ-204 Developing Solutions, AZ-305 Designing Infrastructure Solutions, AI-102 Designing AI Solutions (TRAINOCATE, 2022)
- Oracle MOOC: PL/SQL Fundamentals & SQL Fundamentals (2018)
- LinkedIn Learning: LINQ with C# Essential (2022); Deep Learning Image Recognition (2021)

EDUCATION

Master of Economics – Business Economics

Aug 2017 – May 2020

Kasetsart University

Bachelor of Science – Geography

Jun 2007 – Jun 2011

University of Phayao

PUBLICATIONS

- “Predicting SET index movement direction using technical indicators and machine learning,” Proceedings of the 58th Kasetsart University Annual Conference (Apr 2020).
- “Predicting stock price and stock price index movement using technical indicators and machine learning,” Independent Study, Master of Economics (Business Economics), Kasetsart University (Jan 2020).
